

Product Image Best Practice

- Select “*Actual Size*” when printing. The image should be printed no larger than 3.5” x 3.5” as it is in this PDF (do not “*Scale To Fit Media*” or resize the image when printing).
- Using design software, the image may be extracted from this PDF as a PNG file with a transparent background. If you need the transparent PNG file but do not have the ability to extract it, we will provide it upon request.
- If you need additional images (a PNG, larger product images or lifestyle images of our baked goods for social media), please contact the Barista Pro Shop Marketing Department and we will provide them.
