

Richard's

RAINWATER

The Raining Champion

Richard's been doing this since 1994. His neighbors took notice, prompting Richard to start a business installing his collection systems, ultimately becoming the first person to receive regulatory approval to capture, bottle and distribute rainwater in 2002.

Water Is Cleanest Before It Touches The Ground

We test every batch of rain for any impurities and our water is 100X cleaner than the strictest bottle water standards—that's before we filter it twice and hit with UV light.

Beer Brewery Partners

We capture the rain with the help of our craft brewery partners. They already have the capability to bottle and can, so Richard's Rainwater is captured, and is bottled and canned on site. It means, additional revenue for a small business and a place for us to celebrate.
